

Test Accessories

Taber® Abraser & Shear / Scratch Tester Accessories

Record test details on each specimen.

Specimen mounting cards (S-36 and S-36-1) provide a unique way to capture pertinent test data on each specimen. On the back of smooth card stock is a printed test report that enables critical information to be recorded. A pressure sensitive adhesive makes these cards ideal to mount flexible specimens. Plus, they prevent the formation of wrinkles caused by the rub-action of the abrading wheels. Mounting cards are offered in 4¼ inch (108mm) square or round formats.

Mounting sheets provide non-slip attachment.

Coated on both sides with a pressure sensitive adhesive, specimen mounting sheets (S-37 and S-37-1) permit the testing of samples without a center hole. The adhesive sheet allows you to affix specimens directly to a specimen table that does not have the mounting screw. One side consists of a printed test report, permitting use of the sheet as a mounting card. Mounting sheets are offered in 4¼ inch (108mm) square or round formats.

Specimen plates enable the testing of coatings.

Taber offers a selection of specimen plates to assist with the evaluation of coatings. Different substrates permit testing based on the usage of the product, and include: wood, steel, aluminum, zinc, glass, and plastic.

Test Accessories

Taber® Abraser & Shear / Scratch Tester Accessories

Specimen Mounting

S-36	Specimen Mounting Card, Square – 4 1/4" (108mm) square card coated on one side with a pressure sensitive adhesive, test record form printed on reverse side	50 pcs.
S-36-1	Specimen Mounting Card, Round – same as S-36, but round	50 pcs.
S-37	Specimen Mounting Sheet, Square – 4 1/4" (108mm) square card coated on both sides with a pressure sensitive adhesive, test record form printed on one side to permit using as mounting card	100 pcs.
S-37-1	Specimen Mounting Sheet, Round – same as S-37, but round	100 pcs.

Store in original container

Recommended storage conditions: temperature 23°C ±2°C and relative humidity 50% ±5%

Specimen Plates

S-31	NEMA Standardization Plates, Glass – 4" (100mm) square, 1/8" (3mm) plate glass with a 1/4" (6.5mm) center hole	10 pcs.
S-34	NEMA Standardization Plates, Zinc – 4" (100mm) square, 1/32" (0.8mm) zinc with a 1/4" (6.5mm) center hole	5 pcs.
S-16	Specimen Plates, Steel – 4" (100mm) square, 20 gauge steel with a 1/4" (6.5mm) center hole	10 pcs.
S-17	Specimen Plaques, Wood – 4" (100mm) square, 1/4" (6.5mm) thick birch plywood with a 1/4" (6.5mm) center hole	10 pcs.
S-18	Specimen Plates, Aluminum – 4" (100mm) square, 19 gauge aluminum with a 1/4" (6.5mm) center hole	10 pcs.
S-38	Specimen Plates, Plastic – 4" (100mm) square, 1/8" (3mm) Plexiglas with 1/4" (6.5mm) center hole	10 pcs.

Miscellaneous Rotary Abraser Test Accessories

S-11	Refacing Disc – 4" (100mm) diameter, 150 grit abrasive paper used to reface Taber Calibrase® abrading wheels	100 pcs.
ST-11	Duplex Refacing Stone – 4" (100mm) diameter x 1/4" (6.5mm) thick, with 1/4" (6.5mm) center hole, opposing sides are fine and coarse – used to reface Taber Calibrase® abrading wheels or as an abrasive stone to test molded "wheels"	1 each
140-109	Counterweights –for use with the Taber Rotary Abraser, reduces the arm load by 125g (175g counterweights also available)	2 each
	Taber Clean-Up Hose – attaches to the rear vacuum nozzle arm opening, facilitating instrument clean-up and cleaning of test specimens
